

roadmap

small

- add casual country names to country code json file
- make the botface smile
- react to a few ASCII faces
- know a little everyday chit chat
- additional, *hands-on* info block after #welcome fmt block
- make chatbot component height adjustable for user
- add konica minolta logo to headline
- emoji support? no..!

big

- clarify session identification and finalize BRM mapping
- make bot respond to statistical queries
- clarify production hostname, get certified, and implement TLS
- ~~add a clientside persistent layer to restore state on page load~~
- dump all conversation data to a grand DB
